

Country-level data collection form: Central office

Global Inputs (2007)			
Population (entire country)	77,127,000	FMOH	
Crude birth rate (per 1000) (entire country)	40	FMOH	
Number of births (entire country)			
Number of pregnancies (entire country)			
Percent of women receiving antenatal care (entire country)	52%	FMOH	
Percent of deliveries performed by a skilled medical attendant (entire country)	16.40%	FMOH	
Modern contraceptive prevalence rate (%) (all WRA entire country)	10%	DHS	
Referral rate for PAC (H.Center to Hospital) (%)		MAG	
Number of hours in full-time personnel work year *			

\* For example, if the norm is 40 hours per week and 48 weeks per year then the number of hours worked per year for an FTE is 40\*48=1920.

Average number of clients per month in entire health system:

FMOH

National out-patient visits plus admissions

FMOH

Number of births in entire system in 2007

FMOH

Number of surviving infants in 2007

FMOH

Total maternal health contacts

Number of women who had an abortion in entire health system in 2007:

MAG

Of the women who had an abortion in 2007, what percent were...

In the first trimester?

%

MAG

In the second trimester?

%

MAG

Of the women who had a 1st trimester abortion in an SDP in 2007, what percent were...

Done with MVA?

MAG

Done with sharp curettage?

MAG

Done with medication?

MAG

Of the women who had a 2nd trimester abortion in an SDP in 2007, what percent were...

Done with sharp curettage?

MAG

Done with medication or other methods?

MAG

Number of women treated for post-abortion care in entire health system in 2007:

MAG

**Women admitted with post-abortion complications**

No. in 2006

1. Shock:

MAG

2. Sepsis:

MAG

3. Incomplete abortion:

MAG

4. Cervical and vaginal lacerations:

MAG

5. Uterine perforations:

MAG

**Total number of women admitted with these PAC complications (sum):**

MAG

\* Note: Since some patients may have more than one post-abortion complication, the numbers of complications may add up to more than the total number of women admitted in the entire health system with post-abortion complications.

No. in 2006

**Lab tests related to these PAC complications (entire health system):**

MAG

\* Note: If data are unknown, then ask if total number of lab tests in the entire health system is available. If yes, write down number and ask for best estimate of the percent of these tests that were done for women with post-abortion complications.

	Health Centres	Unit	Hospitals	Unit
Percentage of all facility contacts at this level that are abortion-related		(percentage)		(percentage)
Percentage of women who first seek care at this level		(percentage)		(percentage)
Percentage of women who actually receive care at this level		(percentage)		(percentage)
Capacity: total contacts per facility per year (maternal health and other)		(number)		(number)
Number of Facilities	690	(number)	143	(number)
